The Board of Trustees
City of Pontiac General Employees Retirement System
Pontiac, Michigan

Dear Board Members:

The purpose of the annual actuarial valuation of the City of Pontiac General Employees Retirement System, as of December 31, 2011 is to:

- Compute the liabilities associated with benefits likely to be paid on behalf of current retired, active and vested inactive members of the Retirement System,
- Compare accrued assets with accrued liabilities to assess the funded condition of the Retirement System, and
- Compute the City's recommended contribution rate for the Fiscal Year beginning July 1, 2013.

This valuation has been conducted in accordance with generally accepted actuarial principles and practices. Data concerning active members, vested inactive members, retirees, beneficiaries and assets was provided by the Retirement System Administrator. This data has been reviewed for reasonableness, but no attempt has been made to audit such information. The valuation was based on the provisions of the Retirement System as amended through December 31, 2011. The actuarial assumptions used in this valuation represent reasonable expectations of future experience under the System. The valuation was performed under the supervision of a member of the American Academy of Actuaries, as indicated, who meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Respectfully submitted,

Denise M. Jones
Senior Consultant

Sandra W. Rodwan
Member, American Academy of Actuaries

Valuation Summary

Purpose of Valuation

The purpose of the annual actuarial valuation of the City of Pontiac General Employees Retirement System as of December 31, 2011 is to:

- ❖ Compute the liabilities associated with benefits likely to be paid on behalf of current retired, active and vested inactive members of the Retirement System,
- ❖ Compare accrued assets with accrued liabilities to assess the funded condition of the Retirement System, and
- ❖ Compute the City’s recommended contribution rate for the Fiscal Year beginning July 1, 2013.

Liabilities and Funded Condition of Retirement System

Accrued liabilities of the Retirement System as of December 31, 2011 were computed to be \$249,739,988. The funding value of accrued assets was \$383,379,729. The ratio of the funding value of accrued assets to accrued liabilities was 153.5%.

Funding Value of Assets

A smoothed market value of assets was used for the December 31, 2011 valuation. This method, which spreads capital gains and losses (realized and unrealized) over five years, is the same as the method used for last year’s valuation.

Financial Data

	<u>12/31/2011</u>	<u>12/31/2010</u>
Smoothed Valuation Assets	\$383,349,729	\$399,573,669
Market Value of Assets	395,299,593	419,879,232

Retirement System Experience

The overall experience of the Retirement System during 2011 was less favorable than expected based on the long-term assumptions. The recognized investment income on the smoothed funding value of assets was less than assumed (1.36% vs. 7.5% assumed). Salary increases which were less than assumed partially offset the loss on the recognized rate of investment return. There was a significant decrease in the number of active members during 2011.

Benefit Provision Changes

There were no changes in benefits used for the valuation.

Assumption and Method Changes

There were no changes in assumptions or actuarial cost methods used for the valuation

Participant Data

	<u>12/31/2011</u>	<u>12/31/2010</u>
Active Members	87	207
Active Member Payroll	\$3,968,743	\$9,493,229
Retirees and Beneficiaries	1,118	1,112
Annual Pensions	\$19,317,937	\$19,044,892
Vested Inactive Members	230	187
Annual Pensions	\$2,298,485	\$1,250,723

Computed City's Contribution Rate

The employer Normal Cost contribution rate was computed to be 19.87% of member payroll. Actuarial accrued liabilities exceeded the funding value of assets. The excess of the funding value of assets over the actuarial accrued liabilities was amortized over an open 30 year period and applied as a temporary funding credit to offset the employer normal cost.

The total employer contribution rate was therefore computed to be 0.00%, which includes a temporary funding credit that completely offsets the normal cost contribution.

Conclusion: Accrued valuation assets exceeded actuarial accrued liabilities as of December 31, 2011. The funding credit based on 30 year amortization of the excess was more than sufficient to fully offset the City's computed Normal Cost contribution for the fiscal year beginning July 1, 2013.

Section Two:

***Actuarial Calculations –
Funding***

Computed Contribution Rates for the Year Beginning July 1, 2013

The contribution rates shown below are expressed as level percents of active member payroll.

The Normal Cost can be viewed as the long-term on-going cost of the Retirement System.

The excess of valuation assets over accrued liabilities was amortized as level percent of payroll over 30 years to produce a temporary funding credit. At the time valuation assets no longer exceed accrued liabilities, the minimum on-going contribution rate is the normal cost.

Contribution Recommendation:

Normal Cost	
Regular Retirement	13.03%
Pre-retirement Death	0.62
Disability	3.18
Withdrawal	1.04
Administrative Expense	<u>2.00</u>
Total Normal Cost	19.87%
Member Portion	0.00%
City's Computed Normal Cost	19.87%
Temporary Funding Credit	(19.87)
City's Total Contribution Rate	0.00%
Dollar Amount Based on Valuation Payroll*	\$0

*Valuation Payroll was \$3,968,743.

Comments and Conclusion

Comment 1: The overall experience of the Retirement System during the year ended December 31, 2011 was less favorable than expected based upon the long-term assumptions. The primary source of unfavorable experience was the recognized rate of investment return on the smoothed funding value of assets (1.36% vs. 7.5% assumed). The decrease in the funded ratio to 153.5% from 157.4% reflects the experience loss. Note that the effect of the 2008 negative return on market value will continue to be phased into the funding value of assets over the next year. In the absence of significant favorable experience in investment return and other assumptions over this period, the funded ratio will continue to decrease.

Comment 2: The decrease in actuarial accrued liabilities is primarily due to the decrease in the number of active members to 87 from 207 last year.

Comment 3: The present value of future benefits payable to current retirees and beneficiaries was computed to be \$219,255,728. The Reserve for Retired Benefit Payments was reported to be \$204,034,249. We recommend that the difference, \$15,221,479, be transferred from the Reserve for Employer Contributions to the Reserve for Retired Benefit Payments so that the assets allocated to retired lives is equal to the retiree liability as of December 31, 2011.

Conclusion: Accrued valuation assets exceeded actuarial accrued liabilities as of December 31, 2011. The funding credit based on 30 year amortization of the excess was more than sufficient to fully offset the City's computed Normal Cost contribution for the fiscal year beginning July 1, 2013.

Section Three:

***Retirement System
Benefit Provisions***

Benefit Provision Summary

Service Retirement

Eligibility:

Teamsters #214: Age 50 with 30 years of service or age 55 with 25 years of service or age 60 with 10 years of service.

Court/MAPE: Age 50 with 25 years of service or age 55 with 10 years of service.

PPFDA, PPMA and SAEA and AFSCME #2002: Age 50 with 25 years of service or age 60 with 10 years of service.

Non-Union City, Stadium and District Court: Age 50 with 25 years of service or age 55 with 20 years of service or age 60 with 10 years of service.

Annual Benefit:

Teamsters #214: Straight life pension equals 2.25% of 3 year final average compensation (FAC) times years of service.

Court/MAPE: Straight life pension equals 2.00% of 3 year final average compensation (FAC) times years of service.

PPFDA: Straight life pension equals 2.25% of 3 year final average compensation (FAC) times years of service.

PPMA, AFSCME #2002, Non-Union City, Stadium and District Court: Straight life pension equals 2.50% of 3 year final average compensation (FAC) times years of service.

SAEA: Straight life pension equals 2.50% of 3 year final average compensation (FAC) times years of service. Effective January 1, 2010, straight life pension equals 3.00% of 3 year final average compensation (FAC) times the first 20 years of service plus 2.5% of the next 5 years of service plus 1.0% of the next five years of service to a maximum of 77.5% of FAC.

Average final salary (FAC):

Teamsters #214: highest 3 consecutive years out of the last 12 with some lump sums included. **All others:** highest 3 consecutive years out of the last 10 with some lump sums included.

Reduced Retirement

Eligibility:

Teamsters #214: Age 50 with 25 years of service.

Annual Benefit:

Regular retirement benefit reduced for service less than 30 years.

Deferred Retirement

Eligibility:

10 or more years of service, benefit begins at age 60 (age 55 for Court/MAPE); or with 25 or more years of service (including NOMC service after 1993), benefit begins at age 55 (age 50 for Court/MAPE).

Annual Benefit:

Computed as a regular retirement but based upon service and FAC at termination date.

Duty Disability Retirement

Eligibility:

No age or service requirements.

Annual Benefit:

Computed as a regular retirement benefit. Upon termination of worker's compensation additional service credit is granted for period in receipt of worker's compensation and benefit is recomputed. Minimum benefit prior to voluntary retirement age is the greater of a) 15% of final average earnings, or b) an amount equal to worker's compensation benefit.

Non-Duty Disability

Eligibility:

10 or more years of service.

Annual Benefit:

Same as a regular retirement, with a minimum benefit of 15% of final average compensation.

Duty Death in Service Survivor's Pension

Eligibility:

No age or service requirements.

Annual Benefit:

Payable upon expiration of worker's compensation to the survivors of a member who died in the line of duty. Same amount that was paid by worker's compensation to widow, dependent widower, children under 18 and dependent parents.

Non-Duty Death in Service Survivor's Pension

Eligibility:

10 years of service.

Annual Benefit:

Computed as a regular retirement benefit but actuarially reduced in accordance with a 100% joint and survivor election.

Member Contributions

None.

City Contributions

Actuarially determined amounts which are sufficient to cover both (i) normal costs of the plan and (ii) financing unfunded accrued benefit values over a selected period of future years.

Post Retirement Adjustment

Court/MAPE: 2.50% of original retirement income for 14 years.

All others: 2.00% of original retirement income for 18 years.

Retired members (including NOMC retirees) as of 5/31/2001 not eligible for post-retirement adjustments who had at least 9 years and 9 months of service are eligible for a post-retirement adjustment equal to 2.00% of their annual pension or \$1 per month of credited service with a minimum increase of \$120 and a maximum increase of \$300 per year. There will be six annual post-retirement adjustments and then that amount will continue thereafter.

Unused Sick Leave – Final average earnings are assumed to be increased for lump sum payment by 7% for City employees and 8.25% for non-union District Court and non-union City employees.

Actuarial Method Used for the Valuation

Normal Cost. Normal cost and the allocation of actuarial present values between service rendered before and after the valuation date were determined using an individual entry-age actuarial cost method having the following characteristics:

- ❖ The annual normal costs for each individual active member, payable from date of hire to date of retirement, are sufficient to accumulate the value of the member's benefit at the time of retirement;
- ❖ Each annual normal cost is a constant percentage of the member's year-by-year projected covered pay.

Financing of Unfunded Actuarial Accrued Liability. The excess of accrued valuation assets over actuarial accrued liability was amortized as a level percent of payroll over 30 years and applied as a temporary funding credit. The amortization period is unchanged from last year.

Active member payroll was assumed to increase 4.50% a year for the purpose of determining the level percent of payroll amortization payments.

GASB Statement No. 25 Supplementary Information

The information presented in the required supplementary schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation follows:

Valuation Date:	December 31, 2011
Actuarial Cost Method:	Individual Entry Age
Amortization method:	Level percent of payroll, open
Remaining amortization period:	30 years
Asset valuation method:	5-year smoothed market value
Actuarial assumptions:	
Investment rate of return	7.5%
Projected salary increases	5.6% -9.4%
Includes inflation at	4.5%

Membership data as of December 31, 2011, indicated in Section Five of this report.
